CAB International Regional Office Pakistan

Member since: May 01 2012

CABI is an inter-governmental, not-for-profit organization. Our mission is to improve people's lives worldwide by providing information and applying scientific expertise to solve problems in agriculture and the environment. CABI's mission is influenced by our 48 member countries. At any one time CABI is working in more than 70 countries. We were set up by a United Nations treaty and have been in operation for over 100 years. We are committed to making a difference to people's futures by generating and increasing access to scientific knowledge. We work to improve crop yields, combating pests and microbial diseases, protect biodiversity and safeguard the environment, which enables the world's poorest communities to feed themselves. We have been working on cotton for over 30 years notably in Pakistan, India and China. Much of our work has involved IPM, technology transfer and building capacity in a wide range of stakeholders. Cotton is often intensively sprayed with pesticides and yet with understanding of the ecology of the crop and of its pests and diseases, significant reductions can be made on expensive inputs, saving the farmer money whilst also lowering the risk of pesticide contamination to the environment and to the farmer. CABI is pioneer in Pakistan using approach "Training of Facilitators (TOF)" together with Farmer Field Schools (FFS) in projects where the key objectives are crop improvements and farmer empowerment. We are also a major publisher of scientific information.

Deshpande Foundation

**Member since:** Jun 01 2014

Applying a ‘bottom up’ approach to building scalable solutions, the Deshpande Foundation at Hubli Sandbox works to create an effective ecosystem where resources are put to use through entrepreneurship, innovation and sustainability. Located in northwest Karnataka in India, the Hubli Sandbox engages with not-for-profits, academics, organizations and entrepreneurs who are involved with the launch of effective and scalable models of development. We seek to empower communities with leadership and skill development programs that prepare urban and rural youth to lead or manage social enterprises. Through such programs, we strive to launch effective, relevant and scalable solutions through the investment of social enterprises. To date, we have reached more than one million families in Northern Karnataka.

Organization for Social Development Initiatives

**Member since:** Sep 01 2011

Organization for Social Development Initiatives (OSDI) aims to improve living conditions for underprivileged communities in the rural areas of Pakistan through sustainable poverty reduction strategies. OSDI has a unique approach to sustainable development in rural villages with a three pronged policy that works towards enhancing incomes through the Livelihood Assistance Program, reducing expenditures through the Community Development Program and
preventing chronic hunger through the Food Security Program. OSDI has partnered with several international and local partners to conduct high-quality research, design and implement social development initiatives, create awareness and advocate policies that help improve the standard of living for the financially impoverished in these areas. The ultimate goals of OSDI are asset creation and community ownership of projects in order to break the cycle of inter-generational poverty.

Solidaridad

**Member since:** Jan 01 2010

Solidaridad are an Implementing Partner of BCI’s in China, India and Mali. Solidaridad is an international organization dedicated to responsible food production to feed the growing world population and to providing the world with an alternative to fossil fuels like oil and gas.

Solidaridad is convinced that the agricultural sector can produce more efficiently so that it will be able to feed the world population in 2050, as well as supply energy and plastic to the industry. That is why they are investing in enterprising farmers in developing countries and putting emphasis on the improvement of their land use, so that production can increase while at the same time harm to people and the environment is decreased.

Solidaridad focuses on the production chains that matter worldwide and where changes have great impact: coffee, tea, cacao, fruit, textiles, cotton, soy, palm oil, sugar cane, gold and cattle breeding.
