

Data Strategy Manager

Post Announcement

Type of contract: Open - ended contract

Starting date: ASAP

Contract Type: Full-time contract

Salary: GBP 45-55,000

Location: London or Geneva

Application

closing date: 7 February 2021

Description

The Better Cotton Initiative (BCI) — the largest cotton sustainability programme in the world — aims to reach 5 million farmers worldwide with more sustainable agricultural practices, and account for 30% of global cotton production by the end of the 2020-21 cotton season. In less than 10 years, the Better Cotton Initiative and its Partners have supported over 1.6 million farmers in 23 countries in adopting more sustainable agricultural practices. Thanks to these efforts, Better Cotton accounts for around 15% of global cotton production. We are truly a joint effort, encompassing stakeholders from farms to fashion brands and civil society organisations, driving the cotton sector toward sustainability. BCI aims to transform cotton production worldwide by developing Better Cotton as a sustainable mainstream commodity.

BCI is looking for an experienced, strategically focused data analyst to develop and implement the organisation's first data strategy.

An effective data strategy should enable BCI to make significant strides towards meeting our 2030 strategic goals by providing accurate, reliable and actionable data. The role will act as a cross-functional data champion, driving a cultural shift for BCI to fully embrace and leverage data. The Data Strategy Manager will raise standards in data management through technology, governance, process, and compliance efforts.

The Data Strategy Manager will have responsibility for the ongoing development and implementation of BCI's Data Strategy, working closely with senior leadership and all team internally.

BCI comprises several discrete functional areas, each requiring a bespoke approach to support them in their core processes and digital change activities. The Data Strategy Manager's role will have responsibility for the Data Strategy and the positive, cross-functional impact it will deliver. We are currently building a data-warehouse style platform based on Microsoft's software ecosystem but have identified areas for improvement with the journey of data from source to insight.

This new role offers an experienced data leader the opportunity to create value for farmers, members, partners, staff, current and future funding partners and other stakeholders across an organisation with an important mission. It is also an exciting chance to expand on existing data management skills and experience and shape this position.

The role will have the option of working from home, but there may be a need for travel to some BCI locations.

Data Strategy Manager

Post Announcement

Type of contract: Open - ended contract

Responsibilities

- » Lead on ongoing development and implementation of BCI's Data Strategy, composed of 8 work areas:
 - Data Infrastructure
 - Data Governance
 - Data Management
 - Data Modelling
 - Data Insight
 - Data Engineering
 - Security & Compliance
 - Culture Change
- » Define value of good data management and analytics and promote this to the wider team/function heads for broad buy-in
- » Provide senior management with data analysis and reporting to inform effective decision-making
- » Identify innovative ways of using data to meet BCI's strategic aims
- » Introduce frameworks, processes and practices to provide accurate, reliable and actionable data insights
- » Build role as a cross-functional data champion to help create and maintain a data-centric culture
- » Raise standards in the management of data, defining and monitoring these standards
- » Provide training to relevant staff to support the capture, maintenance and analysis of data
- » Build, maintain and monitor relevant systems and platforms
- » Ensure compliance with Global Data legislation including GDPR legislation and other data legislation relevant for BCI Operations

The candidate will have the following Skills, Knowledge, and Experience:
