MEL Grants Coordinator Post Announcement

Starting date: 1 October 2021 **Contract Type:** Annual salary: Location: Application closing date:

Open-ended contract 2,9 to 3,3 millon PKR Lahore, Pakistan

8 August 2021

Job Description

The Better Cotton Initiative (BCI) — the largest cotton sustainability programme in the world aims to reach 5 million farmers worldwide with more sustainable agricultural practices. In less than 12 years, the Better Cotton Initiative and its Partners have supported over 2.3 million farmers in 23 countries in adopting more sustainable agricultural practices. Thanks to these efforts, Better Cotton accounts for around 22% of global cotton production. We are truly a joint effort, encompassing stakeholders from farms to fashion brands and civil society organisations, driving the cotton sector toward sustainability. BCI aims to transform cotton production worldwide by developing Better Cotton as a sustainable mainstream commodity.

BCI receives funding from three sources: earned income for services delivered; grants and donations from private and public funders; and volume-based fees and funding from brands. BCI Retailer and Brand Members pay a fee based on the amount of Better Cotton they source. These fees are channelled to the Better Cotton Growth & Innovation Fund (BCI's farm support programme) and matched by public and private donations. These funds directly support training and skill development for farmers around the world.

BCI is hiring a Global Monitoring, Evaluation and Learning Coordinator to organise the monitoring and evaluation of BCI's donor-funded projects, and to contribute to the overall Research and Evaluation effort of BCI. The global role will be based in Lahore, Pakistan, with semi-frequent domestic and international travel to project sites.

Responsibilities

This role is a new role for BCI – a focal person for monitoring and evaluation components in all grant activities. The position holder will be responsible for ensuring good design of M&E components of all new grants and to oversee or conduct, where relevant, any M&E components of ongoing grants.

In collaboration with the grant or project manager, define and organise the monitoring of progress in the outputs and outcomes of the project, according to the Logical Framework validated by the donor(s), and coordinate the grant end-assessment.

Tasks include, but are not limited to:

MEL Coordinator – Grants & Research Post Announcement

- In collaboration with the fundraising team and project teams, develop the MEL framework for new funding proposals, including M&E resourcing plans and budgets.
- Develop and disseminate data collection and data management tools that are aligned with donor reporting requirements.
- Develop the terms of reference and coordinate the delivery of research studies and evaluations carried out by external consultants.
- Conduct verification visits to validate the data submitted.
- Support the preparation of qualitative data and reporting, such as case studies to demonstrate progress and impact.
- Work with the grant/project manager and wider delivery team to identify learnings and adapt delivery modalities accordingly.
- Contribute to the internal and external communication on the grant: presenting to the project team, to the wider BCI staff, to the donor and other stakeholders.
- Collect, compile, organise and report all monitoring and evaluation research conducted (both internal and external) for different donor-funded projects managed by BCI.

Beyond these specific responsibilities, the Grants Coordinator will do other work as defined by his/her line manager, the Senior MEL Manager.

Profile

The candidate will have the following skills, knowledge, and experience:

n a role focused on designing and/or implementing M&E activities in a NGO or research setting Experience managing research projects in rural settings Experience of designing data collection tools Experience of conducting qualitative and quantitative data collection actities in rural communities Experience in quantitative and qualitative research methods and participatory evaluation methodologies Demonstrated grasp of the key issues in sustainability and/or knowledge of sustainable agriculture, especially in the smallholder farming context Experience of recruiting and managing external consultants to deliver specific pieces of work Experience of compiling reports for external and internal audiences Excellent analytical and problem solving skills with a proactive approach to finding and porposing solutions to challenges within clearly defined boundaries Expérience of managing a busy workload with competing priorities, and delivering assignments to agreed deadlines Excellent IT skills, including confidence with Microsoft Office suite Good data manipulation skills with an understanding of basic statistics Fluency in English, with the ability to tailor written and verbal communications to different contexts and audiences
